Important Note

AXA believes that education is a key step toward addressing your financial goals, and we've designed this material to serve simply as an informational and educational resource. Accordingly, this material does not offer or constitute investment advice, and makes no direct or indirect recommendation of any particular product or of the appropriateness of any particular investment-related option. Your needs, goals and circumstances are unique, and they require the individualized attention of your financial professional.

Portfolios feature AXA Equitable's proprietary managed-volatility strategy (or invest in underlying portfolios that feature this strategy) that currently utilizes futures and options to manage equity exposure when market volatility increases above specific thresholds set for the portfolio. It is not possible to manage volatility fully or perfectly, which could cause these portfolios to underperform or experience losses.

Investment options and available share classes are subject to change. Contact your financial professional for the most up-to-date list of investment options and available share classes.

Amounts in variable investment options are subject to fluctuation in value and market risk, including loss of principal. Clients should consider the charges, risks, expenses and investment objectives carefully before investing. For a prospectus containing this and other information on the investment options listed here, clients should contact their financial professional. Clients should read the prospectus carefully before they invest or send money.

The Retirement Gateway® Investment Options contain various types of investments, including variable investment trusts and mutual funds. Certain investment funds may contain different investments than similarly named investment funds of a different type offered by the money manager. Investment results of the different types of similarly named investments may be higher or lower. Please see the investment fund's prospectus for more information on the type and structure of the investment.

A group variable annuity is a long-term financial product that is used for retirement purposes. In its most basic form, a group annuity is a contract between a company and an insurance company to allow company employees (participants) to make contributions toward a retirement account and then be able to receive payments from the account during retirement years. There are contract limitations and fees associated with variable annuities, which include, but are not limited to, mortality and expense risk charges, sales and withdrawal charges, administrative fees and charges for optional benefits.

Retirement Gateway® is a group deferred flexible premium combination fixed and variable annuity contract and is a registered service mark of AXA Equitable Life Insurance Company. Retirement Gateway® group variable annuity contract is issued by AXA Equitable Life Insurance Company (NY, NY). Co-distributed by AXA Advisors, LLC (member FINRA, SIPC) and AXA Distributors, LLC. AXA Equitable, AXA Advisors and AXA Distributors are affiliated companies and do not provide tax or legal advice.

Retirement Gateway® contract forms #: 2005GAC QP, 2011RG-457, 2012RDPIB-RG, 2012QPRG and any state variations.

"AXA" is the brand name of AXA Equitable Financial Services, LLC and its family of companies, including AXA Equitable Life Insurance Company (NY, NY); AXA Advisors, LLC; and AXA Distributors, LLC. The obligations of AXA Equitable Life Insurance Company are backed solely by its claims-paying ability.
